

Product Overview

The Yebotech electro-mechanical padlock cylinder enhances the ABUS 83 range, known for its high-quality security features. Key attributes include a reinforced stainless steel core (IP 67 rated) that enables digital access control via Yebo-manager software, eliminating battery needs. The ABUS 83/45 padlock body is made from durable, lightweight Titanium aluminum, featuring a double-bolted, 8mm hardened steel shackle for added security. This combination offers a cost-effective medium-security solution, available in eight colors for easy identification in lockout applications. Overall, it is an affordable, lightweight, and secure digital padlock for various security needs, with a 1-year warranty.

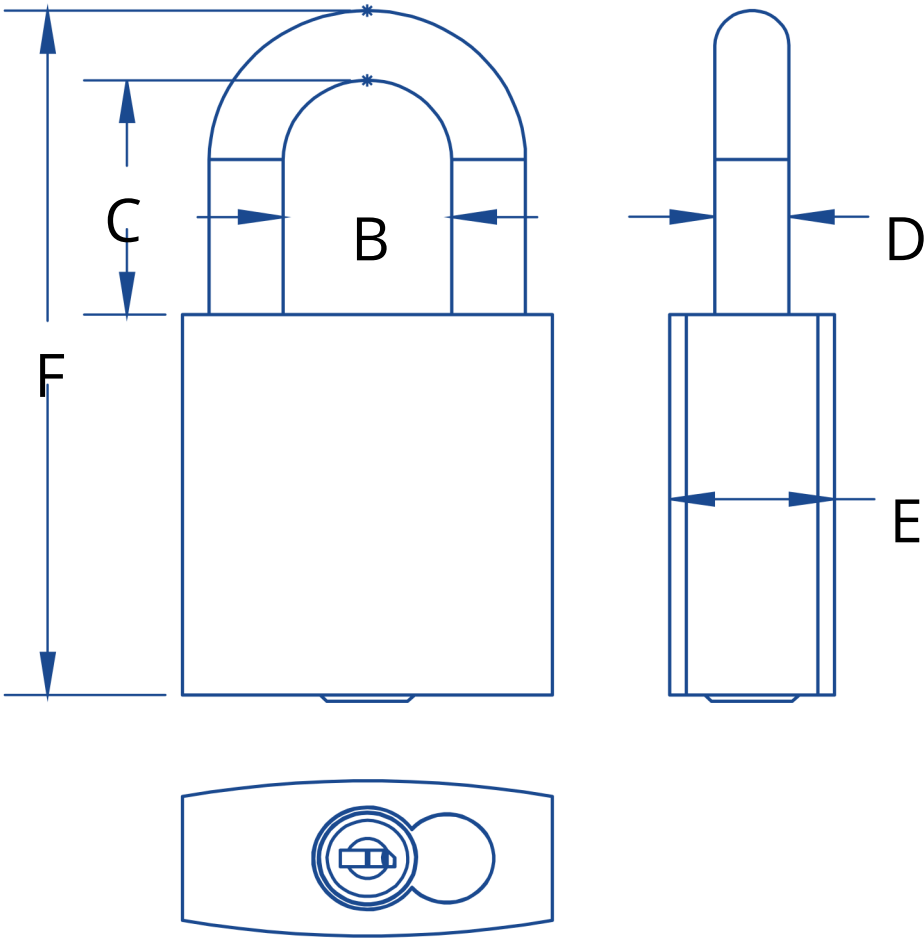

Features

Medium security cylinder padlock High security
Yebotech digital padlock cylinder Programmable digital
access control - fully auditable
for key and lock usage
Hardened 8mm "Nano-Protect" chrome plated steel
shackle - double-bolted with ball bearings for
increasing lock security
